

PRODUCT INFO:

- **Type of frame:** aluminium
- **Type of medium:** multilayer aluminum mesh with protective grids on both inlet and outlet sides
- **Depth of frame:** 8 – 150 mm
- **Media color:** silver
- **Operating temperature:** up to 200 °C
- **Recommended final pressure drop:** 200 Pa
- **Disposal:** in case of irreversible damage to the filters, they should be disposed of at a scrap metal collection facility
- **Warranty:** valid for the entire service life of the filter

GENERAL DESCRIPTION:

- **Application:** for capturing oil and grease aerosols in exhaust systems of food service operations. Suitable for trapping coarse dust particles in foundries, smelters, and the steel industry.

GREASE FILTER ISO Coarse 40 % (G2)
